EDUCATION

Bachelor of Computer Application   Majlis Arts And Science College Puramannur,kerala
2020 - 2023

Plus Two (Biology Science)   GJHSS Naduvattam
2018 - 2020

SSLC   GJHSS Naduvattam
2017 - 2018

EXPERIENCE

Codeedex Technologies | Jr.Flutter Developer   Perinthalmanna | March/2025 - Present
- Worked collaboratively with designers and backend engineers to develop comprehensive solutions aligned with business goals and user needs.
- Developed and deployed cross-platform mobile applications for both iOS and Android using Flutter.
- Implemented app publishing procedures via Google Play Console

Adacode Solutions | Flutter Developer   Kozhikode | Jun 2024 - Sep 2024
- Spearheaded the design and development of multiple cross-platform mobile applications using Flutter framework.
- Collaborated closely with designers and backend developers to deliver end-to-end solutions that meet business requirements and staff needs.

Luminar Technolab | Android Flutter Developer(Internship)   Kozhikode | Oct 2023 - Apr 2024
- Gained hands-on experience in Flutter and Dart to build dynamic, cross-platform applications.
- Worked with Sqflite and Hive for efficient local data storage and management.
- Integrated Firebase for backend services, including authentication and database operations.
- Performed API integration to connect applications with remote data sources.
- Utilized GitHub for version control and project collaboration.
- Applied state management techniques for smooth and efficient data handling in mobile applications

---

SKILLS

Programming Languages:	Dart, HTML, SQL, Python
Libraries/Frameworks:	Flutter, Provider, API, Bloc
Tools / Platforms:	GitHub, VS Code, Android Studio, Figma
Databases:	Firebase, Sqflite, Hive, Airtable

PROJECTS / OPEN-SOURCE

KeyRoute | Link   *Flutter,Firebase,Provider*
- Built and maintained Vendor & User apps in Flutter for Android.
- Implemented Google Maps, live tracking, and secure payment UI.
  Designed flows for group bookings, trip creation, and amenities editing.
- Used MVVM architecture and integrated REST APIs in coordination with the backend team.
- Both apps successfully published on the Google Play Store.

Adacode Student App   *Flutter,Dart,Firebase,Provider*
- Built with Flutter for a dynamic and cross-platform experience.
- Utilizes Firebase for robust backend support.
- Implements state management for efficient data handling.
- Offers courses in various fields, including Flutter, Data Science, and more.
- YouTube player (Dependency) is integrated for seamless video content delivery.
- Designed for interactive and engaging learning experiences.

- Ensures students have access to high-quality educational material anytime, anywhere.

Skill Free 2.0 | Link   *Flutter,Dart,Firebase,Provider*
- Academic project modified into Flutter for better UI and performance.
- Created a user-friendly mobile application aimed at day labor workers.
- Workers can be hired and paid on a daily basis.
- Allows users to easily find daily jobs and select a job of their liking.
- Flexible work schedule: users can choose not to work today and look for jobs available on future days.
- The application takes a unique approach by offering skill-free job listings.
- No specific educational qualifications or work experience are required.
- Focus on day labor jobs, making the app accessible to a wider audience.

Simple Calculator App | Link   *Flutter,Dart*
Developed a simple yet efficient calculator app using Flutter. The app supports basic arithmetic operations such as addition, subtraction, multiplication, and division. It features a user-friendly interface and demonstrates core concepts of state management and UI design in Flutter. This project is ideal for those exploring Flutter or seeking a quick, reliable calculator

Skill Free (Academic project)   *Python,,Flask,Android,MySQL,HTML,CSS*
This user friendly Web Application is meant for day labor people where the worker is hired and paid one day at a time. With the help of this website everyone can easily find daily jobs and easily choose a job of their liking. If a person doesn't feel like working today they don't have to work for the day. Instead they can look for jobs available for the next day or the coming days. Skill Free Web Application takes a unique approach here. The applicants does not need to have a specific educational qualification or work experience and the jobs listed will be day labor jobs.
